# ASSOCIATION D'OCEANOGRAPHIE PHYSIQUE

Union Géodésique et Géophysique Internationale

## PUBLICATION SCIENTIFIQUE N° 12

MONTHLY and ANNUAL MEAN HEIGHTS

of

SEA-LEVEL

1947 to 1951

and

unpublished data for earlier years

LIBRARY

INSTITUTE OF OCEANOGRAPHIC  
SCIENCES

BOSTON OBSERVATORY

143 7RA

Secrétariat de l'Association: Det Geofysiske Institutt, Oslo

The Association issues two series of publications, viz. "Publications Scientifiques" and "Procès-Verbaux."

The following numbers have already appeared :

PUBLICATIONS SCIENTIFIQUES.

No. 1. S. F. GRACE :

- I. Historical review of dynamical explanations of tides in non-elongated enclosed seas and lakes.
  - II. Historical review of dynamical explanations of the tides of the Mediterranean, the Baltic Sea, the Gulf of Mexico, and the Arctic Ocean (1931).
- No. 2. Tidal Bibliography (Third instalment). (1932).
- No. 3. Bibliography on tides and certain kindred matters (Fourth instalment). (1936).
- No. 4. PHIL E. CHURCH : Temperatures of the Western North Atlantic from thermograph records. (1937).
- No. 5. Monthly and annual mean heights of sea-level, up to and including the year 1936. (1940).
- No. 6. Bibliography on tides and certain kindred matters (Fifth instalment). (1939).
- No. 7. J. P. JACOBSEN and MARTIN KNUDSEN : Urnormal 1937 or Primary Standard sea-water 1937. (1940).
- No. 8. Report of the committee on the criteria and nomenclature of the major divisions of the ocean bottom. (1940).
- No. 9. B. HELLAND-HANSEN, J. P. JACOBSEN and T. G. THOMPSON : Chemical methods and units. (1948).
- No. 10. Monthly and annual mean heights of sea-level, 1937 to 1946 and unpublished data for earlier years. (1950).
- No. 11. J. P. JACOBSEN † and REX J. ROBINSON and THOMAS G. THOMPSON : A review of the determination of dissolved oxygen in sea water by the Winkler Method. (1950).

PROCÈS-VERBAUX.

- No. 1. Cinquième Assemblée Générale réunie à Lisbonne Septembre 1933. (1934).
- No. 2. General Assembly at Edinburgh, September 1936. (1937).
- No. 3. General Assembly at Washington, September 1939. (1940).
- No. 4. General Assembly at Oslo, August 1948. (1949).
- No. 5. General Assembly at Brussels, August 1951. (1952).

These publications form a continuation of the "Bulletins de la Section d'Océanographie de l'Union Géodésique et Géophysique Internationale," of which there were 17 numbers, No. 1 being issued in 1921 and No. 17 in 1931.

## Committee on Mean Sea-Level and its Variations

*Chairman : J. D. NARES,*  
*International Hydrographic Bureau, Monaco.*

*Secretary : A. T. DOODSON,*  
*Liverpool Observatory and Tidal Institute,*  
*Bidston, Birkenhead.*

### Monthly and Annual Mean Heights of Sea-Level 1947 - 51

#### Introduction

This publication is a continuation of the series consisting of Publications Scientifiques Nos. 5 and 10, the history of which is given in the latter. Work on the present volume was commenced by Dr. R. H. Corkan, and since his death in 1952 has been completed and edited by Mr. Rossiter, who wishes to thank Mrs. Corkan for her assistance. Most of the information has been collected by the International Hydrographic Bureau of Monaco, and the Committee expresses its cordial thanks to the Bureau and to the various national and individual authorities for the ready way in which they have co-operated.

Attention is drawn to the replacement or correction of data previously published ; these revisions are indicated in the appropriate sections of Table B.

Data which are doubtful for any reason are indicated by ( ).

A. T. DOODSON

*(Secretary of the Committee).*

\* This is the Authority which has supplied the information : that maintaining the tide-gauge is sometimes different.

This is the authority which has supplied the information, that maintaining the tide-gauge is sometimes difficult. The letters N.M. indicate *Normal Null*, the zero-surface for a system of precision levelling. When the datum for the heights of sea-level is stated in reference to a national system of precision levelling, no reference to local Bench Marks is made. A number indicates the number of readings of tide-gauge per day; HL indicates high and low water heights only;  $c$  denotes that mean values have been determined by integration from a continuous record;  $a$  indicates that a correction for atmospheric pressure has been incorporated in the entries of Table B.

\* A number indicates the number of readings of tide-gauge per day; HL indicates high and low water heights only;  $c$  denotes that mean values have been determined by integration from a continuous record;  $a$  indicates that a correction for atmospheric pressure has been incorporated in the entries of Table B.

station on Long Island, New York, and the stations on the Atlantic coast of the United States, Canada, and Greenland. The stations are arranged in order of increasing latitude from south to north, and the stations in each country are arranged in order of increasing longitude from west to east. The stations are grouped into three categories: (1) stations where the height of the tide is determined by the mean sea level; (2) stations where the height of the tide is determined by the mean sea level plus a constant value; and (3) stations where the height of the tide is determined by the mean sea level minus a constant value.

This is the Authority which has compiled the information that maintaining the tide-gauge is sometimes different

This is the Authority which has supplied me the information required for a system of precision levelling. When using the theodolite-gauge the zero-surface for a system of precision levelling is sometimes different.

A number indicates the number of readings of tide-gauge per day; HL indicates high and low water heights only;  $c$  denotes that mean values have been determined by integration from a continuous record;  $a$  indicates that a correction for atmospheric pressure has been incorporated in the entries of Table B.
