ASSOCIATION D'OCEANOGRAPHIE PHYSIQUE

Union Géodésique et Géophysique Internationale

PUBLICATION SCIENTIFIQUE N° 20

PERMANENT SERVICE FOR MEAN SEA LEVEL

MONTHLY and ANNUAL MEAN HEIGHTS

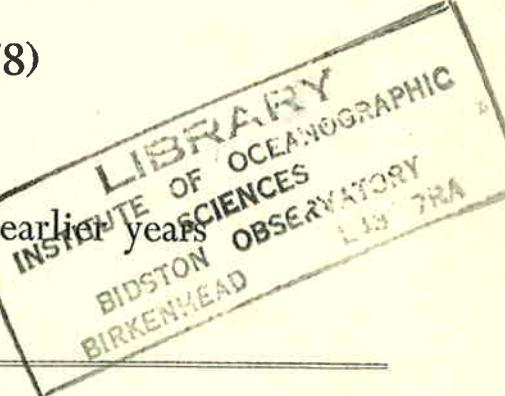

of SEA-LEVEL for the period of the

INTERNATIONAL GEOPHYSICAL YEAR

(1957 to 1958)

and

unpublished data for earlier years

Price Six Shillings

Published with financial assistance from UNESCO

1959

Secrétariat de l'Association :

Oceanografiska Institutet, Göteborg, Suède

Permanent Service :

Liverpool Observatory and Tidal Institute, Birkenhead, England

The Association issues two series of publications, viz. "Publications Scientifiques" and "Procès-Verbaux".

The following numbers have appeared. Prices in shillings and pence are given in brackets; (x) indicates out of print.

PUBLICATIONS SCIENTIFIQUES.

No. 1. S. F. GRACE:

- I. Historical review of dynamical explanations of tides in non-elongated enclosed seas and lakes.
- II. Historical review of dynamical explanations of the tides of the Mediterranean, the Baltic Sea, the Gulf of Mexico, and the Arctic Ocean. (1931). (x).

No. 2. Tidal Bibliography (Third instalment). (1932). (x).

No. 3. Bibliography on tides and certain kindred matters (Fourth instalment). (1936). (1/-).

No. 4. PHIL E. CHURCH: Temperatures of the Western North Atlantic from thermograph records. (1937). (1/6).

No. 5. Monthly and annual mean heights of sea-level, up to and including the year 1936. (1940). (22/-).

No. 6. Bibliography on tides and certain kindred matters (Fifth instalment). (1939). (-/6).

No. 7. J. P. JACOBSEN and MARTIN KNUDSEN: Urnormal 1937 or Primary Standard sea-water 1937. (1940). (1/4).

No. 8. Report of the committee on the criteria and nomenclature of the major divisions of the ocean bottom. (1940). (5/6).

No. 9. B. HELLAND-HANSEN, J. P. JACOBSEN and T. G. THOMPSON: Chemical methods and units. (1948). (2/-).

No. 10. Monthly and annual mean heights of sea-level, 1937 to 1946, and unpublished data for earlier years. (1950). (15/6).

No. 11. J. P. JACOBSEN and REX J. ROBINSON and THOMAS G. THOMPSON: A review of the determination of dissolved oxygen in sea water by the Winkler Method. (1950). (1/-).

No. 12. Monthly and annual mean heights of sea-level, 1947 to 1951, and unpublished data for earlier years. (1953). (12/-).

No. 13. Secular variation of sea-level. (1955). (4/-).

No. 14. G. BÖHNECKE: The principles of measuring currents. (1955). (3/-).

- No. 15. Bibliography on Tides 1665—1939. (1955). (24/-).
- No. 16. Report on oceanographical work from ocean weather ships. (1957). (3/-).
- No. 17. Bibliographie des marées 1940—1954. (1957). 8/-.
- No. 18. Bibliography on generation of currents and changes of surface level in oceans, seas and lakes by wind and atmospheric pressure. 1726—1955. (1957). (8/-).
- No. 19. Monthly and annual mean heights of sea-level, 1952 to 1956, and unpublished data for earlier years. (1958). (12/-).
- No. 20. Monthly and annual mean heights of sea-level for the period of the International Geophysical Year (1957 to 1958), and unpublished data for earlier years. (1959). (10/-).

PROCES-VERBAUX:

- No. 1. Cinquième Assemblée Générale réunie à Lisbonne, Septembre 1933. (1934). (1/6).
- No. 2. General Assembly at Edinburgh, September 1936. (1937). (x).
- No. 3. General Assembly at Washington, September 1939. (1940). (3/6).
- No. 4. General Assembly at Oslo, August 1948. (1949). (x).
- No. 5. General Assembly at Brussels, August 1951. (1952). (18/-).
- No. 6. General Assembly at Rome, September 1954. (1955). (30/-).

These publications form a continuation of the "Bulletins de la Section d'Océanographie de l'Union Géodésique et Géophysique Internationale," of which there were 17 numbers, No. 1 being issued in 1921 and No. 17 in 1931; all out of print.

Permanent Service for Mean Sea Level

- Director:* DR. A. T. DOODSON,
Liverpool Observatory and Tidal Institute,
Bidston, Birkenhead.
- Secretary:* MR. J. R. ROSSITER,
Liverpool Observatory and Tidal Institute,
Bidston, Birkenhead.
- Committee:* M. L. CAHIERRE,
Institut Géographique National, Paris.
MR. L. P. DISNEY,
U.S. Coast and Geodetic Survey, Washington,
D.C.
REAR-ADMIRAL R. W. KNOX,
International Hydrographic Bureau, Monaco.
DR. E. LISITZIN, Havsforskningsinstitutet, Helsinki.
DR. J. PATTULLO,
Scripps Institution of Oceanography, La Jolla,
California.
DR. J. VAN VEEN,
Rijkswaterstaat Directie Algemene Dienst en
Waterhuishouding, The Hague.
-

Introduction

At the 1957 meeting of the International Association of Physical Oceanography in Toronto the growing interest in variations of mean sea-level was acknowledged by the recommendation that the work of the Association's Committee on Mean Sea-Level and its Variations should become the function of a Permanent Service under the auspices of the International Council of Scientific Unions. At the same time the Association augmented the Committee, and in 1958 the Permanent Service for Mean Sea Level was formally approved by I.C.S.U.

The principal aims of the Permanent Service will be the collection and edition of monthly and annual values of mean sea-level from all stations for which material is available. In the past, it had not been a function of the Committee to compute means from tidal observations; tidal authorities were encouraged to prepare the data and, if assistance were required, the Committee supervised the reduction provided the authorities paid the cost of labour. In exceptional cases the Permanent Service is now empowered to reduce tidal observations to mean values free of charge, provided the data obtained are of sufficient importance. In addition, the Permanent Service will, as the need arises, investigate and draw conclusions on various aspects of the data published. At the request of oceanographers interested in variations of mean sea level, the Committee has considered the advisability of including records of salinity, temperature and meteorological variables in this and

future publications. The Committee decided that this procedure was impracticable, but the Service can supply the names and addresses of authorities from whom such data, if in existence, may be obtained.

The formation of the Permanent Service coincided with the advent of the International Geophysical Year, and the A.I.O.P. requested that mean sea-level data for this period should be made available to all potential users at the earliest opportunity. The present volume, therefore, is a continuation of the series consisting of Publications Scientifiques Nos. 5, 10, 12 and 19. In addition to the stations which have featured in previous publications, many new stations which were set up for the I.G.Y. appear in this issue, and the Permanent Service is grateful for the invaluable assistance given by the I.G.Y. World Data Centres A and B (The Agricultural and Mechanical College of Texas and the Institute of Aeroclimatology, Moscow, respectively). It is to be hoped that many of these new gauges will continue to operate and contribute data now the I.G.Y. is ended. Acknowledgement must also be made of the ready response of all the contributors to this volume in respect of the circulars sent out by the Service. The information received regarding gauges, methods of checking and reducing records, etc., has proved of great assistance and will greatly contribute in the future to reducing the amount of correspondence involved in the collation of data.

In this connexion, we wish respectfully to urge all contributors to inform us of any errors they may have noted in this and previous volumes, and also to provide any mean values which have not yet been published.

The replacement or correction of data previously published are indicated in the appropriate sections of Tables A, B or C.

Table A. The authority quoted is that which has supplied the information; that maintaining the tide-gauge is sometimes different.

The datum is that above or below which the heights in Table B are measured.

B.M. denotes a local Bench Mark. When the datum for the heights of sea level is stated in reference to a national system of precision levelling, no reference to local Bench Marks is made.

In the column headed *Obs.*, a number indicates the number of readings of tide-gauge per day; HL indicates high and low water heights only; *c* denotes that mean values have been determined by integration from a continuous record; *a* indicates that a correction for atmospheric pressure has been incorporated in the entries of Table B; *m* indicates médimarémètre.

Tables B and C. Data which for any reason are considered doubtful are indicated by ().

J. R. ROSSITER

(Secretary of the Committee).

TABLE A.

Authorities, Stations and Conditions.

† Tromsø. See Table B.

The information given in previous publications, relating to the datums for stations under the control of the Norges Geografiske Oppmåling, has been incorrect and should have been as listed above. N.N. denotes Norwegian Normal Null. N.N.N. denotes North Norwegian Normal Null.
